The Company "Elektromontaż – Poznań S.A." executed the complete scope of electrical works at construction of GPZ Mahle Krotoszyn [*power supply station*] for Mahle Polska Sp. z o.o. since many years.

In 2005 the scope of works included execution of complete electrical works at primary and secondary sides, including:

- replacement of 110 kV panel gear with supporting structures,
- replacement of 110/15 kV, 16 MVA transformer with 40 MVA transformer including construction of a new transformer station and construction of a temporary station for construction period,
- construction of overhead bus bridge 15 kV dimensioned for continuous current 2000 A,
- replacement of bypass circuits, secondary circuits, protections in 110 kV panel,
- replacement of bypass circuits in 15 kV switching station without interrupting its operation,
- replacement of Al 60x10 busing with Cu 100x10 busing in 15 kV switching station,
- replacement of current transformers in 15 kV switching station (170 pcs),
- installation of 15 kV interrupters and circuit breakers of 2500 A rating current.

We would like to emphasize that the works were executed by Elektromontaż Poznań S.A. in operating GPZ, in compliance with the design and without any reservations in regard to quality or promptness, and the method of execution was fully compliant with the specific character of

Siedziba: Krotoszyn
