12/16 Wieruszowska Str.  
60-166 Poznan, Poland

## LETTER OF RECOMENDATION

**Elektromontaz** - Poznan has worked during the construction of the Wrigley Company factory in Poznan in the period 1994 - 1996 executing a wide range of electrical works

Their scope of works included:

- cabling to power supply (15 kV)
- transformer station (2x 1600 kVA)
- power, lighting and lightning installation
- external lighting
- power supply and control cabling for the process equipment installation

The works were provided according to design. We found all works to be professionally done with good quality and workmanship. I found Elektromontaz personnel at all levels, line workers, site engineer and supervisor and also upper management, to be dedicated to the successful completion of the job.

I would recommend **Elektromontaz-Poznan** as a good, very capable contractor and executor of electrical works.

  
Charles M. Copper  
Project Manager
